

Do I need to hire a wedding planner?

The Oaks includes day-of coordination services for all of our weddings. Please see below for details.

Some clients may want or need additional help planning their event. Maybe you need someone to arrange guest travel and book hotels, put together a full design for your wedding or even hire your wedding vendors. If this sounds like you, you might explore hiring a wedding planner - doing so can be a wonderful investment. We have some excellent recommendations on our vendor list. These are all planners we have worked with in the past and whom we work really well with. Having said that, feel free to bring in any wedding planner you'd like and we'll be happy to collaborate.
